Full work authorization in Germany | Available at short notice
Open to relocation within Germany | Available for international travel

Profile

Systems administrator with over ten years of experience in server and network infrastructure at internet service providers, businesses and industrial companies. Core skills include Windows Server and Active Directory, Linux, virtualization with VMware ESXi, Hyper-V and Proxmox VE, routing, monitoring and Python automation. Experience modernizing industrial IT using Siemens SIMATIC and WinCC, complemented by project experience in web design, responsive website development and Android apps for passengers and drivers.

IT Experience

IT Infrastructure Specialist / Systems Administrator

PEJAM GULF | Iran | 02/2020 - 12/2025

- Redesigned network infrastructure and built virtualized server environments using Proxmox VE, VMware ESXi and Hyper-V.
- Migrated production systems through P2V without reinstalling software, including driver and hardware adjustments.
- Virtualized and secured Windows-based control systems using Siemens SIMATIC and WinCC for container-handling vehicles; replaced discontinued industrial computers with standard mini PCs.
- Administered Windows Server, Active Directory, Group Policy, IIS and Linux servers; built an automated SSH-based backup server for business-critical data.
- Operated LAN, WAN and WLAN infrastructure with OSPF routing and site connectivity; automated workflows using Python and monitored systems with PRTG and MikroTik The Dude.
- Introduced a company-wide VoIP telephone system and Jira ticketing; provided user support and resolved critical incidents in SCADA environments.

IT Infrastructure Specialist / Network Administrator

FARDAD AZARAKHSH | Iran | 03/2017 - 01/2020

- Administered Windows and Linux servers, including IIS, FTP, firewalls, remote access and system hardening.
- Deployed centrally managed WLAN using MikroTik CAPsMAN and a hotspot across a five-hectare industrial site.
- Implemented automated backups and replication using Veeam, Hyper-V Replication and KLS Backup; operated centrally managed antivirus solutions.
- Contributed to LTE rollouts and OSPF routing in several cities; maintained passive, active and backbone network infrastructure.

Network Specialist / NOC Technician

Sari System, Hormoz Net, Dehkade Ertebatat Dorbord | Iran | 05/2015 - 02/2017

- Automated the remediation and hardening of approximately 300 compromised network devices using Python, reducing processing time from about three weeks to under one hour.
- Built and operated a microwave link between Qeshm and Bandar Abbas, wireless backbone networks and WANs using MPLS, VPLS, OSPF and RIP; maintained PPPoE and VPN servers for around 15 rural areas.
- Monitored NOC networks with PRTG, The Dude, Zabbix and Grafana; developed API-based automation for maintaining points of presence (POPs).

Web and Android Projects

Esfandiari Taxi

2026 | Design and development | taxibaiersdorf.com

- Designed and developed an integrated taxi booking system with a responsive website, two Android apps (passenger and driver) and a central administration area.
- **Passenger app:** ride requests using GPS or manual address entry, maps, booking status and cancellation before acceptance; large controls for older users.
- **Driver app:** availability control, incoming ride requests and acceptance, with sound and vibration notifications.

Photos By Armita

2026 | Design and development | photobyarmita.com

- Designed and developed a responsive photography portfolio with themed galleries, a service overview and a contact form.
- Optimized image display, loading performance and SEO; configured the custom domain and contact-form spam protection.

Technical Skills

Servers and virtualization: Windows Server, Active Directory, Group Policy, Linux (Ubuntu, Debian, CentOS), VMware vSphere / ESXi / vCenter, Hyper-V, Proxmox VE, KVM, P2V migration

Networks and WLAN: TCP/IP, LAN/WAN, VLAN, OSPF, BGP, RIP, MPLS/VPLS, VPN (IPsec, OpenVPN, L2TP), DHCP, DNS, QoS, NAT; MikroTik RouterOS and CAPsMAN, Cisco IOS, Ubiquiti UniFi / airMAX, Mimosa, microwave links

Monitoring and automation: Zabbix, PRTG, Grafana, MikroTik The Dude, SolarWinds, SNMP, Syslog; Python, Bash, PowerShell, REST APIs, JSON, YAML

Backup and security: Veeam Backup & Replication, Hyper-V Replication, KLS Backup, rsync, firewall administration, system hardening, incident response, ESET, Kaspersky

Cloud: Microsoft Azure: knowledge of virtual machines, networking, storage, backup and Entra ID

Industrial IT and communications: Siemens SIMATIC, WinCC (SCADA/HMI), Windows-based control systems, VoIP, SIP, Asterisk, PPPoE

Other tools: Jira, Wireshark, Git, VS Code, Apache, Nginx, IIS, Samba, PuTTY, WinSCP, TeamViewer

Professional Development

Completed online courses with completion certificates from the respective learning platforms.

Microsoft Azure Administration and Azure Fundamentals | TOSINSO | 10/2023

Windows Server 2022 Administration | TOSINSO | 05/2023

Linux Administration covering LPIC-1 LPIC-2 and Linux Essentials | TOSINSO | 05/2023

Cisco CCNA 200-301 Networking | Maktabkhooneh | 05/2023 | 58 hours

Python Programming Fundamentals and Advanced Course | Maktabkhooneh | 2022 - 2023 | 113 hours

Education

Two-year higher education qualification (Kardani) in Computer Software Engineering
Islamic Azad University | Iran | 2013 - 2015

Current Employment

Part-time Service Employee | McDonald's | Herzogenaurach | Since 03/2026
Daily customer communication in German and teamwork in a shift-based environment.

Mobility

Available for worldwide travel, including assignments lasting several months. Iranian driving licence held; currently preparing to obtain a German driving licence.

Languages

German: B1 | English: intermediate spoken communication; technical reading comprehension
Persian: native
